Founder and President of North Shore Nephrology in Manhasset NY Named VP of Membership

Dr. Simon E. Prince of North Shore Nephrology officially becomes Vice President of Membership of Nassau Physicians Foundation.

The announcement is significant because Dr. Prince will be responsible for all external awareness of the organization. He will be instrumental in forging relationships with local physicians and extending the visibility of NPF. This will be accomplished by bringing together a diverse group of physicians from different specialties and encouraging them to participate in charitable events.

As the newly-appointed President of the Medical Staff at North Shore University Hospital, Dr. Prince presides over a group of 3,000 physicians, many of whom are potential members of NPF. The Manhasset-based nephrologist brings not only business and financial expertise, but his determination to become more involved in his community and help his fellow Long Islanders make informed decisions about their health.

"Nassau Physicians Foundation is an amazing organization, founded by an amazing individual," says Dr. Prince. "I am excited to be working with Dr. Bilha Chesner Fish, who is known for donating her time and expertise to the local community and making a difference in the lives of so many people. I am profoundly proud to be a part of NPF and look forward to helping this organization achieve its noble mission."

About NPF

Nassau Physicians Foundation was established 5 years ago. Its goal is to provide a stimulating environment for physicians, raise funds for medical research, and offer extensive community service programs. For more information you can visit www.nassauphysicians.org
